

# The hard facts!

**BOR-ON provides information about the type of materials to be repaired, in order to avoid the use of incorrect repair methods.**

**Includes software with links to the manufacturers recommended repair methods as well as test certificate printout.**

**Four easy steps!**

Clean surface

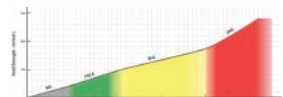

Make test

Read result...

**BOR-ON material test gives several advantages:**

- Increase the quality of the estimate and avoid time consuming supplementary estimates.
- Give information if the part can be repaired straightened or if it has to be exchanged.
- Gives information regarding the material so that correct welding parameters can be obtained.
- Gives information of the material so that correct straightening and repair time is charged.

...and compare with BOR-ON material scale

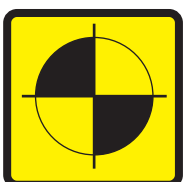

Pat. Pend.

**Art.no: ST1200**

- Contains:**
- Electronic Steel Analyser
